

## **Project Details**

Project name:.....NATO Roudnice TANKFARM AND TERMINAL FOR DIESEL FUEL

Contractor, contact: ....... Hídépítő Zrt., Ferenc Sági, +3614652215

End user:..... Czech Army

Scope of works: ...... Delivery, fabrication, assembly and commissioning of complex technology part of

tankfarm and tanktruck terminal including auxiliary operations

Period of performance: ... 2008

Project details: ...... The completely new facility which is located in area of CEPRO tankfarm

Roudnice ensures storage of diesel fuel for mimitary purposes in underground steel tanks witch capacity 5000 m³ each. The tanks are filled through product pipeline. Tank trucks loqading terminal is equipped with bottom loading arm located in special steel house underground for high secirity against attack. Tankfarm and tanktruck terminal are constructed in accordance with all NATO standards.

Technological equipment consist of metering lines based on FMC Smith meter instruments, PROTEGO flame arresters, EMCO Wheaton loading arms, FINDER pumps, Armaturka Krnov valves. The whole facility is controlled by system TAMAS® developed by VAE CONTROLS. TAMAS® is sophisticated system for control of complete tankfarm operation, administration of loading and unloading process, drivers, tanktrucks and orders for fuel.
